活動簡介

全球正面對氣候變化的挑戰，各地政府致力推動減少碳排放，並加快能源轉型步伐，綠色新能源，特別是分別適用於海、陸、空運輸的綠色甲醇、氫能及可持續航空燃料的研發及應用，更成為熱門議題。同時，隨着各行業積極深化環境、社會及管治（ESG）工作，與氣候變化息息相關、相互影響的生物多樣性議題備受重視及關注，如何把保護生物多樣性納入企業風險評估及業務營運中，成為一大挑戰。

為響應 8 月 15 日全國生態日，煤氣公司將連同可持續合作夥伴香港管理專業協會，於 2024 年 8 月 15 日假香港海事博物館舉行生物多樣性暨新能源高峰論壇，並邀請來自不同界別的專家出席進行演講及圓桌研討會，議題涵蓋各類綠色運輸能源的機遇及挑戰，與自然相關的 ESG 披露及監管發展，以及企業如何把生物多樣性考量納入營運。參加者可了解議題的最新趨勢及發展，參考各企業實踐的個案分享，共同推動綠色轉型，邁向可持續未來。

高峰論壇以線上線下形式同步進行，費用全免，歡迎有興趣人士登記參與。

Introduction

The world is facing the challenge of climate change, and governments around the globe are committed to reducing carbon emissions and accelerating the energy transition. The development and application of green methanol, hydrogen, and sustainable aviation fuel (SAF) for sea, land, and air transport have become hot topics. At the same time, as industries actively deepen their environmental, social, and governance (ESG) work, the biodiversity issue closely related to and interacting with climate change has received growing attention and concern. How to incorporate biodiversity protection into corporate risk assessment and business operations has become a significant challenge.

To respond to National Ecology Day on 15 August, The Hong Kong and China Gas Company Limited (Towngas), together with its Sustainability Partner the Hong Kong Management Association, will host a Biodiversity and New Energies Symposium on 15 August 2024, at the Hong Kong Maritime Museum. Experts from different sectors will be invited to deliver speeches and participate in roundtable discussions on the opportunities and challenges of various green transportation energy sources, ESG disclosure and regulatory developments related to nature, as well as how companies can integrate biodiversity considerations into their operations.

Participants can learn about the latest trends and developments in these issues, and reference case studies of corporate practices, to jointly promote the green transformation and move towards a sustainable future. The summit will be held in a hybrid format, and is free for admission. Interested parties are welcome to register.
